We Regret to Lose Them.

For about 19 years David Howell has been associated with the Mt. Sterling National Bank, during nearly eight years of which he was Cashier. Recently he severed his connection therewith, hoping to locate where the climatic conditions would be more favorable for his health. After some prospective visits to Florida, he accepted the Cashiership of the Dutton Bank at Gainesville, Fla., and on January 1 he and his wife and two children left to make their home in that city. In our estimation David Howell was one of our best citizens and business men; attentive to business, cautious agreeable, courteous, popular, a christian gentleman. He is worthy of the confidence and friendship of the people in his new home. While we regret to have him and his family leave us, we cheerfully commend them to the people of Gainesville.

Shingles are now made under a patented process from asbestos fiber and portland cement. Owing to the enormous pressure under which the shingles are manufactured, it is said that they absorb, when fresh, only about five per cent. of their weight of water; and when exposed to the atmosphere for a year or two that hydration and subsequent crystallization make them absolutely impermeable.
